

Field-Trip for Children ***November 24th, Amsterdam***

WHAT IS IT?

In working with parents and children, I realized that my work is not only with children, but also to offer parents a break. Inspired by my vivid curiosity in a variety of areas, and passion for sharing what I know with children, I have designed a service to help broaden their horizons. These workshops are designed with the intent that inquisitive and curious children can benefit from a special opportunity to meet other similarly passionate peers to relate with, and to forge new positive experiences of being with others.

WHAT WILL YOUR CHILD GET FROM ATTENDING?

Your child will discover a topic that he may not be aware of yet, and which may ignite an interest, nourishing his perspectives and understanding of the world. Being part of a community of peers of their age category and equally eager to learn will make the experience of visiting a museum or reflecting on questions a joyful and enjoyable moment. This can also help children who may have few experiences of satisfactory friendships gain confidence in their ability to be with others, and enjoy being with fellow companions. During our time together, the children will have the opportunity to interact in a peaceful and respectful environment, allowing each of them to speak up and have their voice heard in the group.

IS IT FOR YOUR CHILD?

These workshops are most useful for children between age 8 and 11. Your child should be able to concentrate and enjoy reflecting as the purpose of these workshops is to enrich their understanding of the world's topics, and delve collectively into advanced subjects. An ability to behave appropriately and to respect the group dynamics is also required.

TOPIC

----> Why do we still speak of the Greek civilization, more than five thousand years after it appeared?

What are the origins of the Greek empire, why did it emerge as the main power at that time? How did people live in Athens, why did they believe in multiple Gods and Goddesses? These are some of the questions we will be exploring during our next Field-Trip devoted to Ancient Greece. We will focus more precisely on the emergence of the Greek empire, the innovation it brought about in terms of politics, architecture, philosophy. We will explore the Greek Pantheon and some of the main founding myths of this civilization.

A visit to the [Amsterdam Allard Pierson museum](#) will illustrate the topic, and I will lead the group in an exploration of the collection to make tangible the notions discussed previously. Back indoors, the children will work on a topic selected by the group.

WHEN IS IT?

Saturday, November 24th, from 12.30pm to 5.30pm

WHERE IS IT?

OBA Library Roelof Hartplein 430, 1071 TT Amsterdam

WHAT LANGUAGE WILL BE SPOKEN?

English- with the language level adapted to children who are not native English speakers, but can understand well this language. I will adjust my pace, use of words during the presentation, and children will have space to ask any question they may have.

Note: There is another Field-Trip for native English speakers, or children who can speak English fluently, taking place every other month

HOW MUCH IS IT?

Introductory Price: 85 Euros, museum/tram tickets & snack included
75 Euros, for 2 or more children from the same family

HOW DO I REGISTER?

By sending an email to: marion@caringforthe giftedchild.com

The full pre-reservation will be asked if you are interested in participating. Your transfer will be returned to you provided that you cancel 5 days prior to the day of the event, as the group will be limited to 6 children.

To find out more about our past Field-Trips and updates regarding the upcoming ones, you can visit our Facebook page:

Do not hesitate to share this information around you!

Warmly,
Marion

About Marion Franc

Marion Franc is a Mentor and Coach for Gifted Children, and their Parents.

I started my career as an Optical Engineer with a joint degree in Innovation and Entrepreneurship, and worked in Silicon Valley and China. After these experiences, I found that being an International Engineer was not my calling. Having the most creative and playful soul, I recognized that I needed to channel my gifts into a connection with human beings vs technology. My journey led me to be interested in the development of children, including Gifted Children, being one myself. I hold the Montessori 0-3 Assistant to Infancy Certificate from AMI (Association Montessori International).

My mission is to support Gifted Children- develop harmoniously the full depth of their potential by providing Educational Play services, and to help their Parents in making sense of their role as caregivers, and of the unique child that they have. The skills I developed in the seemingly unrelated fields of science, education, music, or humanities, contribute to the special value and richness of the guidance I provide my clients with.

I believe that when children's and parents' needs are heard and met, families have the capacity to live their most meaningful and joyful life ever!
